

» **Accomplishments in JSV "Gomelglass".**

The first phase of the project with JSV "Gomelglass" has been accomplished.

The goal of current project is to deploy paperless workflow and [quality management system](#), based on [LotusNotes/Domino6](#) products from IBM. Software complex consists of two parts: "[Quality management system](#)" and "DocFlow management".

Using that system, one of the major region enterprises will benefit in:improving enterprise management
automating information management automating audit automating document processing obtaining full range
statistics and reports facilities immediate and direct access to documents for all involved stuffmanaging
access levels to the informationcutting operational costs
