

» E-Business / Internet

The rapidly developing information technologies bring about new business rules and concepts. In the today's competitive environment, businesses need tools that provide for quick and simple information management and ensure teamwork within a company and/or business community. As a result, companies achieve effective decision-making, resource management, and high labor productivity. IBA-Gomel offers a wide range of e-commerce solutions based WebSphere products by IBM Corporation, the world leader in the sphere of Internet technologies and the author of the term "e-business".

WebSphere is a superior Internet infrastructure software, or middleware, for creating, running and integrating applications across a variety of computing platforms. Built on open standards (such as Java 2 Enterprise Edition and XML) and new web service standards, and endowed with IBM 's core strengths of reliability, scalability and security, WebSphere is used by tens of thousands of customers.

We offer the following solutions based on reliable WebSphere platform:

Corporate B2B and B2C systems Customer relationship management (CRM) Electronic payment systems
Integrated components for ERP systems Information portals and e-commerce applications
